

Initial Build Review Notes

Brat Album Site

- Honestly LOVEE the site build as a whole!
- The Apple nav element is such a great touch thematically, and also being able to revisit the navigation panel.
- I think the navigation setup is so nice, but wonder if w/each one you click, ONLY that page is revealed, instead of sending you down past the other pages.
- Charlie xcx >> Charli xcx :)
- Maybe an image of Charli could be incorporated for the About Page?
- The gradient from top to bottom on the site background is super nice.
- Wondering if line length could get a little bit shorter or line spacing could open up just a bit.
