

Mockup Review Notes

Brat Album Site

Overall:

- Both mockups are super successful and really communicate the "Brat" vibes!
- I really liked the use of green/black and think it works really well in each
- I overall prefer the style of Mockup A

Mockup A:

- LOVE the image treatment, works really well with the style of the site, leaning into the electronic vibe
- For the iphone version, I wonder if the image came first before the intro text? (just a thought though)
- navigation placement: I like that it isn't right at the top. It works super well with the single page idea, wondering though instead of one *single* page, this home/landing stays as is the whole time, but as the new headers (background, music, etc) are clicked, what's below changes but the main page stays as is each time
